GENERAL INDEX TO VOLUME 84

JANUARY–DECEMBER, 1940

January	**Pages 1–66**
February	**" 67–134**
March	**" 135–200**
April	**" 201–270**
May	**" 271–340**
June	**" 341–410**
July	**" 411–480**
August	**" 481–550**
September	**" 551–626**
October	**" 627–696**
November	**" 697–772**
December	**" 773–846**
Mid-December	**" 847–905**

A

ACCIDENTS AND ACCIDENT PREVENTION Page

Avoiding gas-fired furnace explosions. H. P. King....772f
Compressed air empties oil drums..... Alex Gray, *43; E. J. Duff, 323; E. W. Feller 462
Don't use compressed air to empty barrels or drums. George Edwards..*171
Dow Chemical piles coal in horizontal layers to prevent fires.....*289
Dry-firing a boiler. C. C. Custer.....*172
Fire-bucket holder. S. M. Elonka....*673
Fire hazards. Charles Wiggins.....*829
Furnace explosions—an operating responsibility. H. M. Spring.....*153
Nets make overhead working safe. C. H. Wiley *112
Safe painting steel stacks. W. E. Rossnagel *292
Safety reminders for the power plant. L. W. Larson..... 742
Screened cages for oily waste. G. M. Wilson *745
Warning in starting pulverized-coal fire *243
Washington's office buildings eliminate refrigeration hazards in air conditioning system. C. A. Peters.....*140

AIR COMPRESSORS

Compressed air can be used safely. E. J. Duff.....*323
Compressed air empties oil drums. Alex Gray, *43; George Edwards, 171; E. J. Duff, 323; E. W. Feller..... 462
Compressor-repair cost cut by welding. W. S. Hines.....*381
Don't use compressed air to empty barrels or drums. George Edwards..*171
Electric clocks measure compressed-air flow. H. P. King..... 93
Emptying oil drums with compressed air. E. W. Feller..... 462
Maintenance aided by compressed air. F. G. Rechberger.....*524
Steam-driven air compressor takes small space, has high efficiency. P. K. Richardson *632
Tin-can muffler for air receiver. A. B. Allen *113
Traps drain air receivers. S. H. Coleman *177
Western Maryland Railway Co. modernizes compressor plant at a saving. W. J. Crabbs.....*495

AIR CONDITIONING

Air conditioning moves ahead (A.S.R.E. and A.S.H.V.E. meetings).....*162
Bankers Life Insurance Co. Des Moines, is designed as ultra-modern building *661
Disney studio of 14 buildings is air conditioned at various temperatures.*290
First National Bank of Atlanta installs up-to-the minute air conditioning..*575
Hospital plants still need a doctor. C. T. Baker.....*325
1939 developments in air conditioning.. *2
Panel heating surveyed. L. N. Rowley.*482
Washington's office buildings eliminate refrigeration hazards in air conditioning system. C. A. Peters.....*140
Air coolers for turbine-generators. Kohl & Hesler *143
American Boiler Manufacturers Assn. and Allied Industries—June meeting....*446a
American Society of Heating and Ventilating Engineers—Cleveland meeting..*162
American Society of Mechanical Engineers—Milwaukee, Wis. meeting....*504

Page

Officers elected 760
Oil and Gas Power meeting in Asbury Park *537
Philadelphia meeting *893
Spring meeting in Worcester.....*397
American Society of Mechanical Engineers and American Institute of Mechanical Engineers
Fuel Division and Coal Division meet..*827
American Society of Refrigerating Engineers—Chicago meeting.....*162
Skytop, Pa. meeting.....478c
American Welding Society meeting.....767b
Appalachian Coals, Inc. meeting.....619b
Apprentices needed. U. J. Grant..... 50

AWARDS

Joseph F. Carney honored by N.A.P.E...479b
Edison Electric Institute presents awards 479a
Edison medal to Torchio..... 53
Gas turbine medal to Dr. Adolph Meyer *832
Modern Pioneers receive awards.....*261

B

Bearings—Alarm system for hot bearings. Osborne, Roetger, Carlson, Maher..*601

BELTS

Check data for conveyor belts (Power's Data Sheets) 686
Engineering V-belts to suit the drive. F. L. Ives (tables).....*812
How to select and maintain rubber belts. James Adams, Jr.....*150
Modernized belt drives cut costs, increase production. L. H. Skougor..*535
Modernizing eliminates belt trouble. R. O. Spencer..... *43
Three belts run on one flywheel. W. F. O'Regan *76
Tools for belt repair (Power's Data Sheets) *833
V-belts for speed.....*467

BOILERS

ABC's of draft. W. H. Pugsley....pt 1, *522; pt 2, *594; pt 3, *668
Air preheaters for heat balance.....*366
Blowdown essentials reviewed. Harry Spring *375
Blowdown tank connections. Gibbons, Carey, Johnston, Lincoln, Chamberlain, Bancroft.....*178
Boiler-room accessories *605
Boiler room "dont's".....669
Building a boiler. R. H. Emrick.....*706
Change in pipe holds feedwater temperature. H. P. King.....*455
Cleaning boiler tubes. Flowers, Gorrie, McNally *746
Cleaning soot from boiler tops. Simons, Lawson, Mullen, Bradley, McNally, Markland *458
Close that stack damper. R. A. Spengler 134c
Condenser scale. R. E. Hall.....338c
Condenser scale conquered with hexametaphosphote at Station K, Omaha. J. O. Olson.....*164
Cooling the bearings of an induced-draft fan. H. Doughty.....*673
Cracked boiler head repaired. H. M. Spring *454
Cracks in boiler plates. F. L. Berry..772f
Cracks in boiler shell plates. A. C. Wiggins *524
Damper controlled by window operator. J. O. G. Gibbons.....*177
Disk-type meter to measure cold water, repaired. O. M. Roberts..... 45
Dissolving sludge. Aufhauser, Homanns, Pearson, Dobson 460
Dominion steel installs third boiler burning hot dirty blast gas. W. S. Wilson *733
Dry firing accidents. C. C. Custer.....*172
Economizers selected by chart.....*296
Facts on fuel and ash (A.S.M.E. meeting) *881
Feedwater treatment—1940 (A.S.M.E.).*423
Figuring boiler efficiency. Phil Swain..*603
Five burner types and furnace arrangements *827
Forced circulation. H. M. Spring.... 532
Forced circulation stops corrosion of firetube boilers *282
Furnace explosions—an operating responsibility. H. M. Spring.....*153
Gage glass bulb. C. A. Van Duersen..*821
Hammer loosens coal in chute.....*384
Hot-water boilers in series heat California building. T. W. Bean.....*241

Page

How to build big-unit efficiency into the small plant. Joseph Breslove, Jr. *715
How to repair a blistered boiler shell. H. M. Spring.....*451
Kraemer firing system makes good showing on Europe's low grade fuels. M. F. A. Wulfinghaoff.....*328
Lamps signal when to blow down boilers. S. H. Coleman.....*816
Meter charts blowdown. A. A. Markson *77
Meter records boiler efficiency..... *28
Model maker's problem.....*608
Model of new Ford River Rouge boiler.*378
Norwich, Conn. installing Riley boiler for municipal lighting department...*294
Photography of furnaces. Reynold Atlas *453
Portland, Ore. utility cleans boiler with inhibited acid. Brown, Briggs, & Coryea *80
Progress in boiler design (A.S.M.E. meeting) *884
Rain water for boiler feed. Alling, Pef, Gorrie, French, Hannah, Ellison, Pincus, McKean, Farrugia, Spring, Potts 824
Safe lighting for boiler interiors. H. M. Spring *683
Shell Oil refinery installs completely outdoor boiler (picture feature)..... 805
Shields prevent soot-blower erosion. Orville Hiksch *527
Slag-tap furnace experience. J. P. Toplosky *808
Somerset Station of Montaup Electric Co. orders forced-circulation boiler..546c
Starting oil burner. Gibbons, Bachman, Ciotti, Spring, Gabriel, Cronin, McNally, Sold *388
Stub tubes keep boiler working. R. O. Billings *658
Superheater operation experience.....*312
Surpass Leather increases boiler efficiency 15% by rebuilding furnaces and pulverized-coal firing. C. M. Harrington *37
Texas Co.'s Port Arthur refinery is served by outdor boiler plant.....*485
University of Missouri installs cross-drum boiler and exhaust-heating turbine generator and cuts costs. R. H. Sogard *136
Vibrating cleaner deslags boiler tubes. A. G. Wiggins..... 818
Walkover Shoe factory no. 4 shows high boiler efficiency. H. A. F. Campbell *817
Watch that feedwater connection.....*667
Water in engine cylinder. Gibbons, Corrigan, McNally, North, Malochee, Bradley, Lequesne, Mullen, deRosa, Parkinson, Pef, Freuler.....*747
Water supply for desuperheaters. H. P. Cleary *599
Watertube boilers. E. J. Duff..... 182
What is efficiency? G. D. Bradshaw.. 252
Youngstown Sheet & Tube plant feed treatment supplies 100% makeup at 825 lb., 750 F.....*637

C

Cables—Rubber mountings increase rope life on elevators. H. C. Gaither.... 66f
Wire rope, how to socket. James Dickson 625b
Wire rope, 6 x 19. A. S. Riarden....*284

CHIMNEYS

Carriage simplifies working on a stack. Leslie Bradley *671
Dynamite in water shatters concrete stack. C. R. Wenz.....*457
Safe painting steel stacks. W. E. Rossnagel *292
Scaffold for safe stack painting. W. E. Rossnagel *418
Simple way to take down steel stack. C. R. Wenz.....*177
Static chimney draft. (Power's Data Sheets) 613

COAL

Belt and scraper-flight conveyors handle coal at Bryce E. Morrow Station. H. V. Schiefer.....*428
Bituminous coal market areas (map)..*491
Bituminous coal minimum prices established *728
Bituminous coals available (table) ... 790
Burner firing *798

(*) illustrated. (Ed) Editorial

Page

Chemical ABC's of combustion.. 777
Chester Station—pulverizers for each boiler. Schick & Bishop *700
Chicago sewage plant's coal handling system. W. G. Hudson.....*507
Coal fields and producing districts (map) 788
Coking index for various coals. C. E. Pritchard *302
Conveyor for coal is used at Taylor Instrument Co.'s plant, Phil Swain....*242
Dow Chemical piles coal in horizontal layers to prevent fires..... .....*283
Fuel beds in action.. ....*796
"No coal shortage" 185
Research program for bituminous industry 845a
Sampling method for coals classed by ash content 787
Small-plant coal handling equipment pays. W. A. Lofft.....*26
Specimen analyses of typical coals (table) 789
Weighing coal. McHanrahan, Zekuthy, Roetger *600

COMBUSTION

Burner firing *798
Chemical ABC's of combustion..... 777
Easiest way to figure combustion (charts) 774
Fuel beds in action..... ..*796
Fuels and combustion..... 322
How fuels burn.....*794
How to figure volumes (charts)..... 779
Liquid and gaseous fuels (tables & map) 792
Smoke, flyash and cinder.....*800
Spending the fuel dollar..... 803
Which fuel for your plant?.....*801
Working from analysis to solve combustion problems (tables)..... 782
Compass, beam. R. O. Spencer.....*525
Condensers—Power engineer should always ask why. P. R. Elrod.....696n

CONTROL

Boiler efficiency meter..... *28
Chester Station—control circuits for 50,000-kw extension. Schick & Bishop *700
Hydraulic governor or servomotor, to control double extraction turbines....*580
Hydraulic press has wide range of speed control *258
Meters—the watch dogs of plant operation. R. R. Frederick..... *14
Milwaukee places in operation high-efficiency water pumping plant. Arthur Rynders.....*286
Model meter and control board tests new ideas for Consolidated Edison. Johnson & Metz.....*370
1939 developments in instruments and control *2
Pressure gage shows well-pump operation. C. R. Roberts.....*246
RCA Mfg. Co. coordinates power operation with loudspeaker system..... *12
Rochester Athenaeum & Mechanics Institute gives instruction in instruments and controls.....*395
Safe Harbor hydro plant meters water. J. M. Mousson, pt 1, *650; pt 2.....*708
Singer Building modernizes the elevators to give 25% more service.....*372
A. G. Spalding cuts steam-generating costs with automatic operation. V. T. Fahringer, told to C. C. Herman..*587
Standard Oil Co.'s Cleveland refinery solves dual fuel problems with automatic control. W. E. Sachse.....*492
Thermostatic traps should be watched for pressure. S. H. Coleman..... 245
Conveyors—Chicago sewage plant's coal handling system. W. G. Hudson....*507
Cooling towers—Skimming pool improves cooling tower. Elton Sterrett.....*386

COSTS AND PERFORMANCE

Beth Israel Hospital makes power improvements on a pay-as-you-go basis.*591
Centrifugal pump speed adjustment will reduce cost of operation. A. Peterson.*426
Coal-handling equipment installed in wool-scouring plant saves $4,000 a year. W. A. Lofft.....*26
Coolidge standby station shows gas-diesel economy in a year's service. R. G. Hornberger.....*724
Engineers should plan their way out of trouble. Lou Rowley.....*105
Hotel New Yorker goes back to pulverized coal firing. Warren Lewis.....*498
Increased plant efficiency from new equipment expressed in dollars and cents. R. F. Emerson.....696g
Rea Station, La. turns in outstanding first year operating record on gas engines. F. H. Coughlin.....*444
Sloane-Blabon Corp. cuts plant costs by $0.15 per M. lb. of steam. R. R. Frederick *430
Southern Bleachery saves 5520 tons of coal per year.....*653
A. G. Spalding cuts steam-generating costs with automatic operation. V. T. Fahringer; told to C. C. Herman..*587
University of Missouri cuts coal cost $15,000 a year with steam-pressure increase. R. L. Sgaid.....*736
Walkover Shoe factory No. 4 shows high boiler efficiency. H. A. F. Campbell.*817
Western Maryland Railway Co. modernizes compressor plant cab's adv... ing. W. G. Crabbs.....*792

Page

Diesel Engineers International Association meeting 767b
Directory of manufacturers for 1941 Mid-Dec. 161
Dust collection see Smoke abatement

E

Edwards, George
"American" means 615
Bend, don't break..... 193
Breaking the rules..... 473
Dynamos for lightning bugs..... 403
Formula for kings..... 263
Half right 129
Is it more blessed to give..... 894
Man's seasons 61
Other ways 689
Saving is having..... 543
Scarred knees 761
Sermons in stones..... 835
Spring 333

ELECTRICITY

Ac generator hunting corrected. Thomas Sheehan 112
Adequate protection of electric circuits *828
Air coolers for generators. Kohl & Hesler *143
Alarm system for hot bearings. Osborne, Roetger, Carlson, Maher.....*601
Alternating current motor applications 233
Alternating current motor troubles and remedies *235
Alternating-current motors. F. A. Annett *221–236
Atom smasher *237
Axial air-blast circuit breaker. H. W. Martin *438
Belt and scraper-flight conveyors handle coal at Bryce E. Morrow Station. H. V. Schiefer.....*428
Cable lug soldering.....*606
Causes of trouble on balancer sets. H. W. Hodgson.....*200b
Conduit system for wiring to a motor. K. B. Humphrey.....*743
Copper strips destroy armature-coil insulation. J. B. Mullins..... 316
Designing a lighting system. Jean Warren *298
Direct current motors. F. A. Annett.*87–102
Drying-out chart after flood (Power's Data Sheets) 189
Elevator motor generator coupling troubles eliminated by lubricator. William Devaughn *316
Empire State Building has a maintenance set-up for elevators. F. G. Rechberger *309
Fluorescent lamp construction and operation, D. M. Warren.....*712
Ford installs 110,000 kilowatt hydrogen cooled generator, D. S. Snell..... *29
Hammers voltage into dc generator. R. O. Cummins..... 111
Hydrogen-cooled synchronous condensers and alternators for 12 years on American Gas & Electric systems.....*161
Meters—the watch dogs of plant operation. R. R. Frederick..... *14
Milwaukee's water-pumping plant is driven by synchronous motors. Arthur Rynders *286
Motor bearing wear should be watched. R. O. Spencer..... 175
Motor-drying problem solved by unit heaters. F. B. Stubinger..... 245
Motor kept from starting by wires in separate conduits. W. T. Estlick.... 50
Neon lamps check ac motor speed. D. M. Charles.....*110
New York World's Fair fountain display *377
Notched polepieces parallel generators. H. W. Hodgson.....*175
Power factor correction with synchronous motors. H. O. Poland.....*634
Principles of industrial lighting. Dean Warren *219
Radio phones on elevator cars. Wm. Devaughn *670
Reactors give smooth speed control of wound rotor motors. H. E. Larson *607
Red lights signal motor trouble. R. O. Spencer 176
Reducing fan speed. Matthes, Wiggins. 318
Single-phase motors *231
Southland Paper Mills turns out first commercial newsprint paper.....*447
Speed adjustment of alternating current motors *228
Squirrel-cage motors *222
Squirrel-cage motors come up to speed better. H. W. Hodgson..... 45
Starting squirrel-cage motors.....*225
Static electricity checked in powder plant with voltmeter.....*809
Synchronous motors *226
Telephone communication in plant by county line phones. S. H. Coleman.*598
Telephone ringer operates gongs. V. T. Kropid *460
Temporary starter for ac motor. H. W. Hodgson *111
Time switches reduce exterior lighting costs. R. C. Henderson..... 244
Westport generator eliminates double-frequency vibration *760
Wound-rotor motors *230
Wound-rotor motors changed to squirrel-cage. R. O. Spencer..... 524

Page

ELEVATORS

Empire State Building has a maintenance set-up for elevators. F. G. Rechberger *309
Lowdown on 6 x 19 wire rope. A. S. Rairden *284
Pull, don't drive brake-shoe pins. William Devaughn *742
Radio phones on elevator cars. Wm. Devaughn *670
Rubber mountings increase rope life. H. C. Gaither..... 66f
Safety lock for elevator doors. Wm. Devaughn *450
Singer Building modernizes the elevators to give 25% more service..*372
Energy explained. Phil Swain.....*321

ENGINEERS

An engineer in politics looks at apprenticeship. T. C. Desmond.....696e
How to turn a boy into an engineer. H. P. King.....*339a
Power engineer. Robert Grimshaw....840b
Power engineer's duties—1890 and 1940. L. W. Thiele.....772a
Reminiscences about the old Chief. William Doran pt 1, *711; pt 2.....*807
Work with tools. W. S. Downs.....339b

ENGINES—DIESEL AND GAS

Air injection engine design. Warren Noble *810
Borden's steam-diesel-powered plant has full heat recovery..... *22
Compressor-repair cost cut by welding. S. W. Hines.....*381
Coolidge standby station shows gas-diesel economy in a year's service. R. G. Hornberger.....*724
Diesel installations since Apr. 1, 1939 (table) 353
Diesel installations under 90 hp. (table). 354
Diesel piston repair. Leslie Bradley....*107
Diesel rings break. Blum, Feyen, Carlson, Stead, Bradley, Corrigan.....*528
Does condensation cause wear in gas engine cylinders? Bill Maddock....*590
Dual outlet reduces engine-exhaust noise. C. C. Lynde.....*527
Exhaust noise reduced by homemade muffler. M. T. Pate.....*111
Gas-engine heat recovery from jacket water and exhaust gas reported by Gas-Engine Power Committee, *159; correction 340a
Gas-engine installations (table)..... 471
Gas-engine installations since Apr. 1, 1939 (table) 355
General Motor's aircraft factory installs diesels *104
Grille prevents fouling exhaust pipe. Elton Sterrett *314
Haverstraw Industrial Terminal modernizes boiler plant operation to burn coal, pitch, tar or oil.....*440
Hints-for healthy diesels. S. S. Hansen, pt 1, *420; pt 2, *500; pt 3.....*588
Hookup solves cooling-water problem. C. E. Freeman.....*547
Houdry process of catalytic cracking discussed at A.S.M.E. meeting.....*537
How to figure diesel waste-heat recovery possibilities. G. C. Boyer....*640
LeTourneau Co. has twenty diesels on power *103
Measuring brake horsepower. P. W. Swain *461
More "mileage" from diesel lube oil. Gentzler, Feyen, Bradley, Woods....*251
Natural-gas engines economical for water pumping drives used by California water companies. G. H. Dieter..*206
New Weatherford, Tex. plant figures. Frank Avis 822
1940 oil and gas power.....*341–356
Practical pointers to look for in buying a diesel engine. G. C. Boyer..*141
Rea Station, La. turns in outstanding first year operating record on gas engines. F. H. Coughlin.....*444
Ship diesels burn heavy oil by solid injection. G. C. Boyer..... *72
Sperry flour mill is powered with 300-rpm. single cylinder diesel.....*169
Sturgis, Mich. municipal hydro plant modernizes equipment and adds diesel unit *275
Timed lubrication. Prof. J. I. Clower..*304
Worn diesel piston. Parkinson, Downs, Ross, Matkins, Patterson, Corrigan, Bradley 823

ENGINES—STEAM

Cylinder lubrication with superheated steam. W. G. Forbes.....*681
Drain container saves oil from engine drips. S. M. Elonka.....*315
Garfield, Utah, plant installs steam-driven air compressor. P. K. Richardson *632
How to lubricate cylinders on wet steam. W. G. Forbes.....*609
How to set up and use an indicator on a uniflow steam engine, *533; correction 604
Lubricating steam engine. Baker, O'Brien, Kiska *114
Measuring brake horsepower. P. W. Swain *461
Valve changes stops engine pounding. R. E. Fontaine.....*317
What makes a good steam-engine cylinder oil? W. G. Forbes.....*362
Erie City Iron Works celebrates 100th year 340b

(*) illustrated. (Ed) Editorial
